- Deep Blue Color
- Dissolves Quickly
- Disperses Rapidly
- Dissolves in Brine
- No Mixing-No Mess!
- Convenient Drop & Go

PAT. PEND.

ADVANCED TECHNOLOGICAL BREAKTHROUGH

Safe-T-Fresh™ has created QuickBlue™, the first dual-film effervescent packet that dissolves in brine. This extraordinary, patent pending process combines PVA film with a paper back to produce a dynamic deodorizer for events and cold weather.

Along with its increased solubility, QuickBlue's effervescent action disperses the contents to create a deep blue, odor-fighting solution.

New Dual-Film Packet
Dissolves In Brine!

Reduces Inventory

And, QuickBlue Event & Winter is the perfect way to reduce your deodorizer inventory costs and improve your service. Instead of stocking an event and winter deodorizer, now you can manage just one product. The pre-measured packet also guarantees more consistent service!

As cold weather approaches, consider using QuickBlue, the only packet you'll ever need for events and winter weather.
